

# DiversyFund Fixed Income Instrument & Capital Stack

**Fixed income yield structure (top-left bar chart)** — each year of the 2-year term is stacked to show the split: 4% paid out as quarterly cash distributions (1% per quarter, shown in teal), and 8% accruing annually (shown in blue), totaling 12% per year.

**Cumulative return on \$100K (top-right line chart)** — tracks cash received vs. the accrued balance across all 8 quarters. Notice the accrued line jumps at maturity (Q8) when the full 8% per year accrued balance (\$16,000 on a \$100K investment at \$8K accrued per year) is paid out alongside the final quarterly distribution — for a total return of \$24,000 over the two-year term.

## ***Important:***

*This example is provided for illustrative purposes only to demonstrate the mechanics of the Note. Actual payments depend on the Company's ability to make such payments and are subject to the risks outlined in the Private Placement Memorandum.*

**Capital stack (bottom horizontal bar)** — shows DiversyFund's priority waterfall from top (senior/safest) to bottom (junior/equity):

1. **Senior secured debt** — your fixed income instrument, secured by an **interest in certain potential litigation proceeds**.
2. **Cash & liquid assets** — operating liquidity buffer.
3. **Real estate profits** — expected manager profits from real estate portfolio.
4. **Tech/ platform value** — the most subordinate layer; absorbed last in any stress

### ***Risk Considerations***

*An investment in these Notes involves a **high degree of risk**. Investors should review the **Private Placement Memorandum in full** before making any investment decision.*
